

Kaushal Kumar

Full Stack Developer

Ranchi, Jharkhand, India | +91-6203077667 | kaushalkr.585@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Creative and detail-oriented Full Stack Developer and final-year B.Tech Computer Science student (Expected May 2026) with proven experience designing and delivering production-grade user interfaces. Proficient in Figma, Adobe Illustrator, and Canva for wireframing, prototyping, and high-fidelity visual design. Uniquely positioned at the intersection of design and engineering — fluent in React.js, Next.js, and Tailwind CSS to hand off pixel-perfect implementations. Delivered interfaces achieving 95+ Google Lighthouse scores with mobile-first, accessible, and visually compelling designs. Seeking a UI Designer role to craft intuitive, user-centred digital experiences.

TECHNICAL SKILLS

Design Tools: Figma, Adobe Illustrator, Canva

Design Skills: UI Design, Wireframing, Prototyping, Design Systems, Typography, Colour Theory, Visual Hierarchy, Responsive Design, Accessibility (WCAG), User Flows, Mobile-First Design

Frontend (Dev): React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux, TypeScript

Other Tools: Git, GitHub, VS Code, Vercel, Postman, npm

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

PROFESSIONAL EXPERIENCE

Database Systems Intern

Jan 2025 – Feb 2025

Rashtriya Ispat Nigam Limited (RINL) — Vizag Steel Plant

Vizag, India

- Produced structured analytical reports and data dashboards translating complex industrial datasets (100,000+ records) into clear, decision-ready visuals for production planning and quality control teams.
- Redesigned and normalised 10+ relational database schemas, reducing data redundancy by 30% and improving the consistency of information surfaced to downstream reporting interfaces.
- Optimised 50+ SQL queries using indexing and aggregation strategies, reducing average execution time by 40% and enabling faster data retrieval for operational dashboards.

Machine Learning Intern

Jun 2024 – Aug 2024

NIST University

Brahmapur, Odisha

- Designed and prototyped the frontend interface for an ML-based healthcare prediction system, presenting model outputs with clear visual hierarchy to support clinical decision-making for 1,000+ patient records.
- Built an end-to-end data pipeline (preprocessing → feature engineering → PCA → model output), improving model performance by 15% and reducing training time by 25%.
- Evaluated model reliability using confusion matrices, ROC-AUC charts, and k-fold cross-validation — translating results into interpretable visual summaries for stakeholder review.

Python Programming Intern

Jul 2023 – Sep 2023

Infosys Virtual Internship Programme

Remote

- Completed 50+ structured programming exercises covering Python fundamentals, OOP design patterns, and core data structures, establishing a strong base for building design-to-code workflows.
- Implemented robust file I/O handling, exception hierarchies, and debugging workflows — improving code reliability across collaborative projects.

PROJECTS

Thumblify — AI YouTube Thumbnail Generator

[Live](#) | [GitHub](#)

React.js, Next.js, Node.js, Tailwind CSS, Redux, REST API, AI Integration

- Built and deployed a full-stack web app that lets content creators generate AI-powered YouTube thumbnails by specifying a title or topic, selecting aspect ratio (16:9, 1:1, 9:16), choosing a thumbnail style (e.g. Bold & Graphic), and picking a colour scheme — with results shown instantly in a live preview panel.
- Engineered a Node.js middleware layer connecting the React/Next.js frontend to third-party generative AI APIs, handling prompt construction, style parameters, and error states to ensure smooth, reliable image generation on every request.
- Implemented Redux state management across the multi-step generation form (topic → aspect ratio → style → colour → prompts → generate), delivering a coherent single-page UX with real-time preview and one-click download.

CLOTHSY — Full-Stack E-Commerce Platform

[Live](#) | [GitHub](#)

React.js, Node.js, Express.js, MongoDB, TypeScript, JWT, AWS EC2, Docker

- Designed and implemented a production-grade e-commerce UI featuring intuitive product browsing, a dynamic shopping cart with real-time inventory feedback, and a visually organised 100+ product catalogue — prioritising clarity and conversion.
- Crafted a RESTful API layer backed by optimised MongoDB aggregation pipelines, delivering sub-2-second page loads and 98% uptime under concurrent load — ensuring the designed experience performed as intended in production.
- Deployed on AWS EC2 with Docker and a GitHub Actions CI/CD pipeline, enabling zero-downtime releases and consistent UI delivery across environments.

ChatBot — AI-Powered Conversational Web App

[Live](#) | [GitHub](#)

React.js, Node.js, Express.js, REST API, AI Integration

- Built and deployed a full-stack conversational chatbot web application, designing an intuitive chat interface with real-time message rendering and a responsive, mobile-first layout for seamless cross-device interaction.
- Engineered a Node.js/Express backend to handle API requests and manage conversational flow, integrating with AI APIs to generate context-aware responses with low latency.
- Implemented clean component architecture and state management to maintain chat history and loading states, ensuring a smooth, reliable user experience across sessions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Nov 2022 – Expected May 2026

NIST University, Brahmapur, Odisha

CGPA: 8.5 / 10.0

CERTIFICATIONS

- Python Programming — Infosys (2023)
- Machine Learning — NIST University (2024)
- Database Management Systems — Rashtriya Ispat Nigam Limited / RINL (2025)
